Dear Hiring Manager,

I am excited to apply for the developer role at your company. With over 5 years of experience in software development, specializing in blockchain, payment processing, and infrastructure, I am confident in my ability to contribute effectively and drive results. My expertise in building end-to-end solutions and passion for innovation align well with your team's needs.

In my previous roles, I developed **blockchain layer 1 solutions**, specializing in Governance & MultiSig pallets. I built **dApps, Faucets, Explorers, Smart Contract Verification systems, and reliable solutions for Staking, Validator Nodes, and NFT management** via a custom wallet. My expertise includes Aura, BABE, and Proof of Stake (PoS) consensus mechanisms, showcasing advanced knowledge in blockchain protocols and network security.

I transformed a high-traff**ic Node.js project serving 1M+ users into Golang, using Goroutines and gRPC** to resolve memory issues and boost performance. I've also worked on **payment processing infrastructure**, integrating third-party services, and building scalable solutions. My initiatives improved API performance, reduced startup times, and enhanced app ratings, leading to higher **customer satisfaction**.

I excel in **agile teams**, working closely with stakeholders and mentoring junior developers to maintain high code standards. I've led projects to **CMMI 2.0 certification**, optimized processes, and helped boost app ratings from 4.3 ★ to 4.9 ★.

I have strong experience with **DevOps concepts** and tools like **AWS, Docker, Node.js, Redis, Postgres, and Datadog**. My full-stack expertise and ability to deliver projects in a fast-paced, data-driven environment make me a great fit for your team. I'm excited about the opportunity to shape your payment processing infrastructure and contribute to your company's success.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and skills align with your team's goals.

Sincerely,

Sulaman Khan
